PANEL

Where Are We Headed? Navigating the Future of Global Air Cargo and Supply Chain

As the world continues to witness transformative shifts in logistics and trade, it becomes essential to understand the current landscape of the global air cargo and supply chain industries. In this session, we will embark on a comprehensive exploration, providing a perspective from leadership on the existing state, advancements, and hurdles faced by air and supply chain logistics in the international arena.

Ralph Cutié, Director & CEO
Miami International Airport

Richard Broekman CCO & Head of Sustainability
Atlas Air

PANEL

Envisioning the Future of Dedicated Freighter Aircraft: Global Demand and Trends

The dedicated freighter aircraft industry is witnessing a surge in demand as global logistics requirements continue to evolve. In this session, we will closely examine the prevailing market trends and forecast the future of freighters. A crucial aspect of our discussion will revolve around determining the most suitable approach – new builds, conversions, or a hybrid strategy – to fulfill the mounting needs in the thriving global freighter market.

Unveiling the Near-Shoring Shift: Exploring Manufacturing Relocation to the Americas

Amanda Montañez
Assistant Director
Savills

Ian Hunter
Director
OCO Global

Alice Ancona
SVP & COO
World Trade Center Miami

The concept of near-shoring has gained significant attention in recent times as businesses contemplate moving their manufacturing and production operations geographically closer to their consumer markets. In this session, we aim to address the validity of the near-shoring buzz, shedding light on the extent of this shift to the Americas and analyzing its implications.
